

# CURRICULUM INTENT

## CREATIVE ARTS

We have **high aspirations** for all our learners at Level 2 and Level 3. Our support is designed to encourage high aspirations within learners themselves, supporting them to gain the confidence they need to progress into successful destinations. For learners with special educational needs, our level of ambition is undiminished.

In our area, we help students gain confidence in the following ways:

- GCSEs in Art and Photography.
- A Levels in 3D Design, Fine Art, Graphic Communication, Photography and Textile Design.
- Level 3 CTECs in Art & Design and Photography.
- Level 3/4 Foundation Diploma in Art & Design and Photography.

Programmes of study develop learners' **knowledge, skills and behaviour** so they can **progress to university, employment or higher levels of study towards these aims**. We offer students not only **breadth of curriculum**, but also an array of **opportunities that complement and enhance** their academic studies. Examples of this in our area include: industry speakers, responding to live industrial briefs, national and international competition entries, gallery visits, cultural trips, Higher Education visits, and subject specific Enrichment Courses.
