

CURRICULUM INTENT

SPORT & PHYSICAL EDUCATION

We have **high aspirations** for all our learners at Level 2 and Level 3. Our support is designed to encourage high aspirations within learners themselves, supporting them to **gain the confidence they need** to progress into successful destinations. **For learners with special educational needs, our level of ambition is undiminished.**

Common examples of destinations for our learners include:

- The University pathway - popular choices are: Sports Coaching, Sports Science, Physiotherapy, Sports Business Management, Sports Rehabilitation; Exercise Therapy
- More recently degrees from UCFB which combine business and football,
- Our most common employment destinations are PE Teaching, Fitness Instructor, Personal Trainer; and the Uniformed Services.

Programmes of study develop learners' **knowledge, skills and behaviour** so they can progress to university, employment or higher levels of study towards these aims. We offer students not only **breadth of curriculum**, but also an array of opportunities that **complement and enhance** their academic studies. Examples in our area include: Our Sports Academies, The TASS programme which supports our elite athletes in their dual career, and an award in Sports Leaders. We also offer the opportunity to travel to Malta and other destinations as part of our social mobility programme.
